Lecture 7

Few more UI controls

This lecture includes how to get and store data in different items.

1. Combo Box

- **How add a item to combo box**

```
comboBox1.Items.Add("Sunday");
comboBox1.Items.Add("Monday");
comboBox1.Items.Add("Tuesday");
```

- **How to retrieve value from Combo Box**

```
string var;

var = comboBox1.Text;
```

Or

```
var item = this.comboBox1.GetItemText(this.comboBox1.SelectedItem);

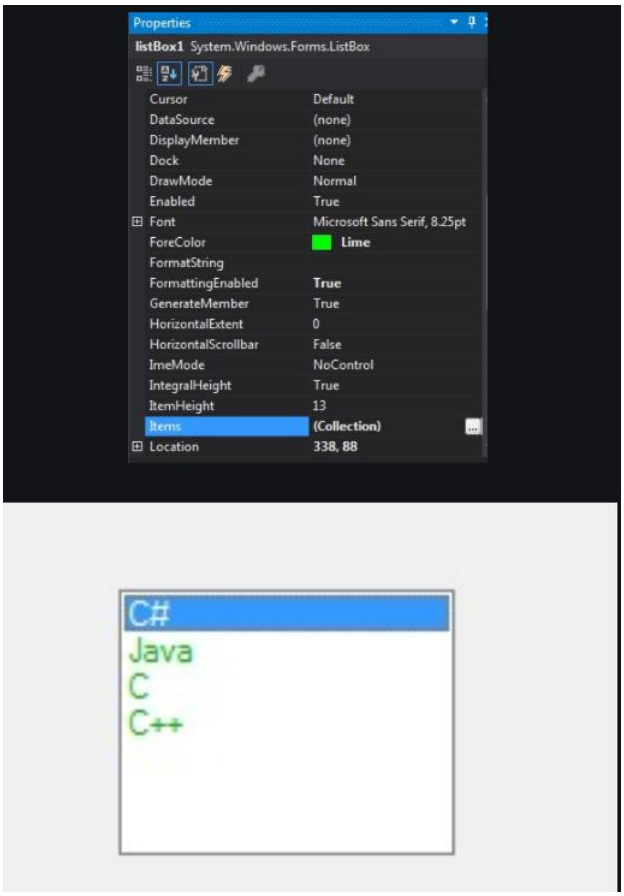

MessageBox.Show(item);
```

- **How to remove an item from Combo Box**

comboBox1.Items.RemoveAt(1); //using index

comboBox1.Items.Remove("Friday"); //using value

2. List Box

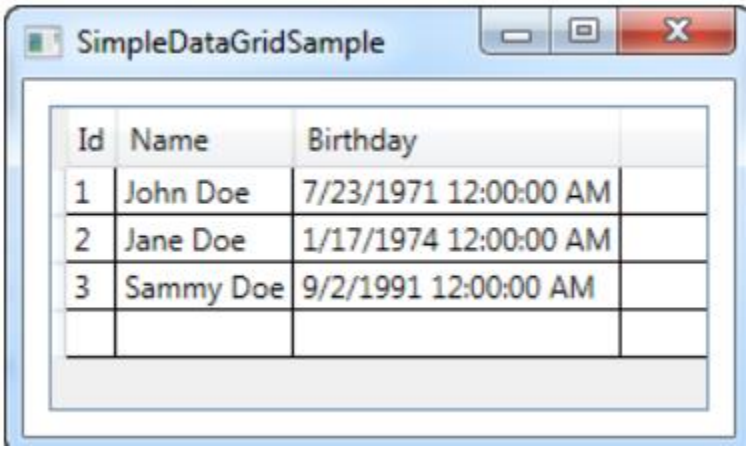

- **Creating Listbox control**

```
ListBox mylist = new ListBox();
        mylist.Location = new Point(287, 109);
        mylist.Size = new Size(120, 95);
        mylist.ForeColor = Color.Purple;
        mylist.Items.Add(123);
        mylist.Items.Add(456);
        mylist.Items.Add(789);
```

this.Controls.Add(mylist);

3. DataGrid View

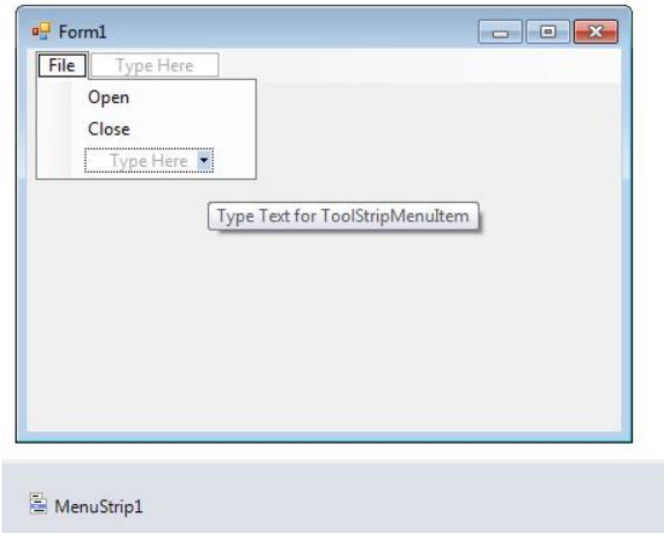

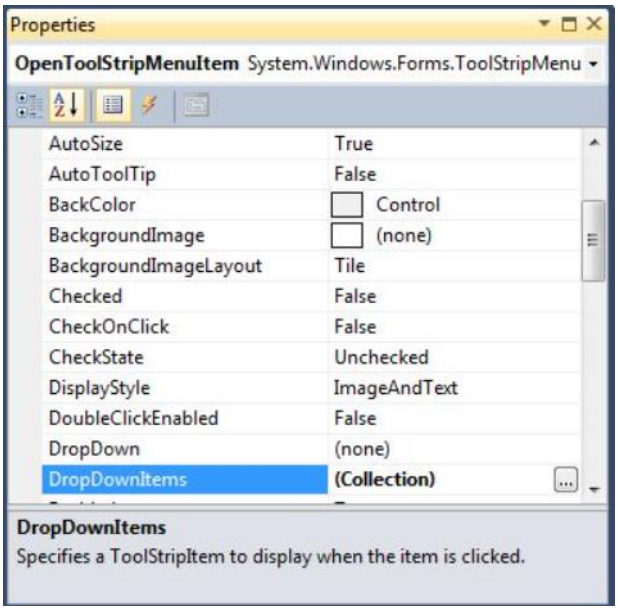

- **How to Use:**

```
dataGridView1.ColumnCount = 3;
        dataGridView1.Columns[0].Name = "Product ID";
        dataGridView1.Columns[1].Name = "Product Name";
        dataGridView1.Columns[2].Name = "Product Price";

        string[] row = new string[] { "1", "Product 1", "1000" };
        dataGridView1.Rows.Add(row);
        row = new string[] { "2", "Product 2", "2000" };
        dataGridView1.Rows.Add(row);
        row = new string[] { "3", "Product 3", "3000" };
        dataGridView1.Rows.Add(row);
        row = new string[] { "4", "Product 4", "4000" };
        dataGridView1.Rows.Add(row);
```

4. Menu Strip

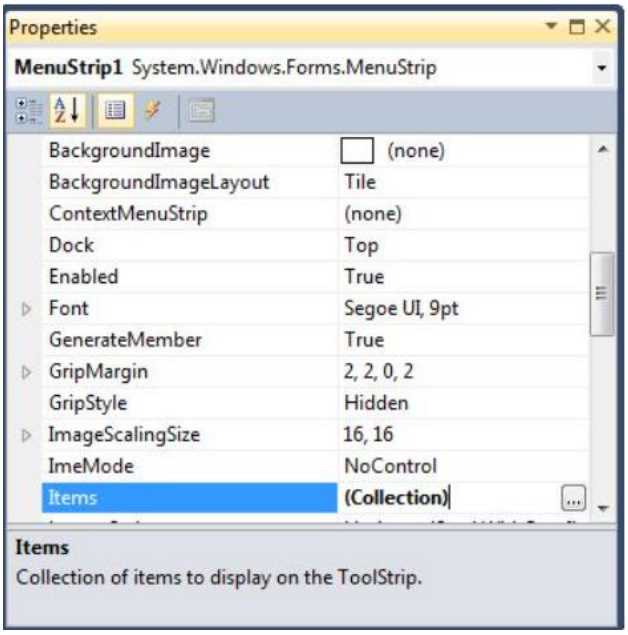

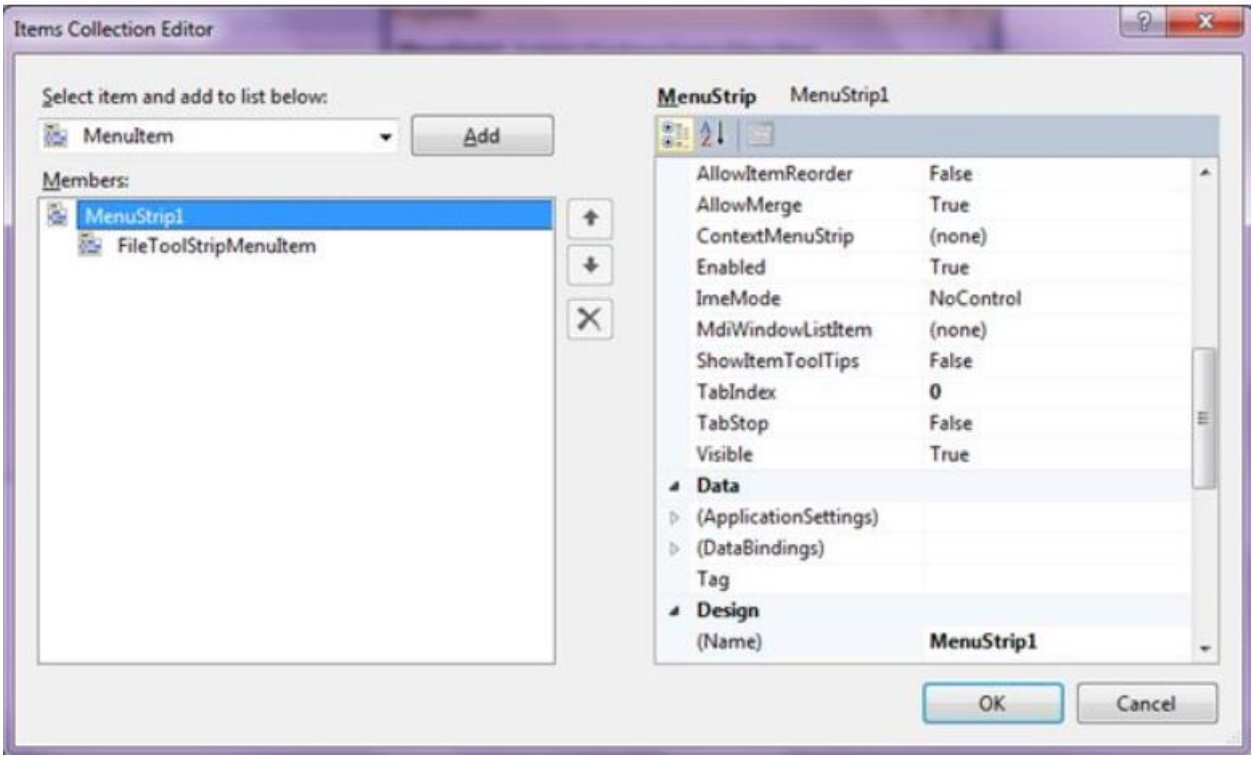

```
MenuStrip MainMenu = new MenuStrip();

MainMenu.BackColor = Color.OrangeRed;
MainMenu.ForeColor = Color.Black;
MainMenu.Text = "File Menu";
MainMenu.Font = newFont("Georgia", 16);
this.MainMenuStrip = MainMenu;
Controls.Add(MainMenu);
```

Adding items

```
// Create a Menu Item
ToolStripMenuItem FileMenu = newToolStripMenuItem("File");
FileMenu.BackColor = Color.OrangeRed;
FileMenu.ForeColor = Color.Black;
```

```
FileMenu.Text = "File Menu";
FileMenu.Font = newFont("Georgia", 16);
FileMenu.TextAlign = ContentAlignment.BottomRight;
FileMenu.ToolTipText = "Click Me";
```

```
MainMenu.Items.Add(FileMenu);
//Event Handlers for menu stip items
private void fileToolStripMenuItem_Click(object sender, EventArgs e)
    {
       MessageBox.Show("New command executed");
    }

    private void openToolStripMenuItem_Click(object sender, EventArgs e)
    {
       MessageBox.Show("Open command executed");
    }
```

Lab Task: Create GUI and functionality for this calculator. Refer to lecture 6 and 7 for help
